Two-Step Equations – Day 1

SHOW ALL WORK!!

Careful with your negatives!

$$\frac{x}{-5} + 21 = 18$$

$$5) \quad -33 + 4x = -11$$

$$2) \quad 40 = -8y - 22$$

$$6) \quad -2 = \frac{k}{9} - 15$$

$$3) \quad \frac{y}{-8} - 4 = -7$$

$$7) \quad -10x + 53 = 28$$

$$4) \quad \frac{x}{7} + 35 = 29$$

$$8) \quad -4 = 31 + \frac{x}{3}$$

Name _____

9) $-31 - 2x = 33$

10) $16 = 29 - \frac{k}{4}$

11) $27 = -13 - 12k$

12) $16 - \frac{k}{11} = 12$

13) $22 = 42 - \frac{y}{6}$

14) $-15 - \frac{x}{8} = -23$

15) $-5 - 3x = 17$

16) $31 = 43 - \frac{x}{5}$
