

## Downloadable Website Templates

There are other options besides creating your own layout and using Dreamweaver templates. You can also download templates that are available on the web and customize them to fit your needs.

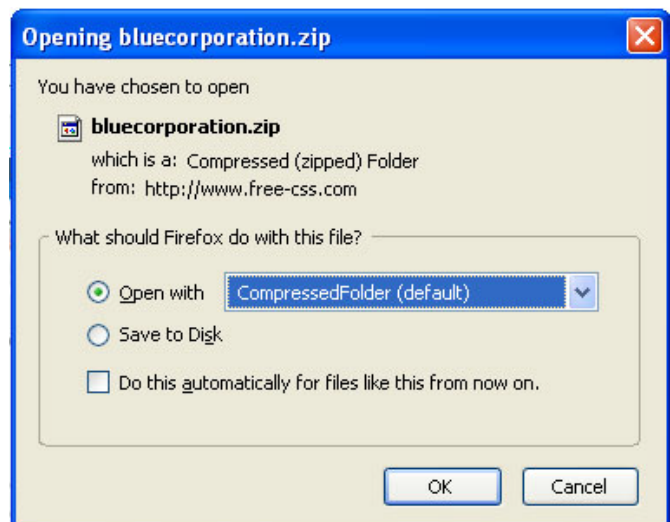

1. Go to <http://www.free-css.com/free-css-templates/page1.php> by typing this address or by clicking the free-css.com link on the calendar.
2. Click on the first template on the page *Blue Corporation*.

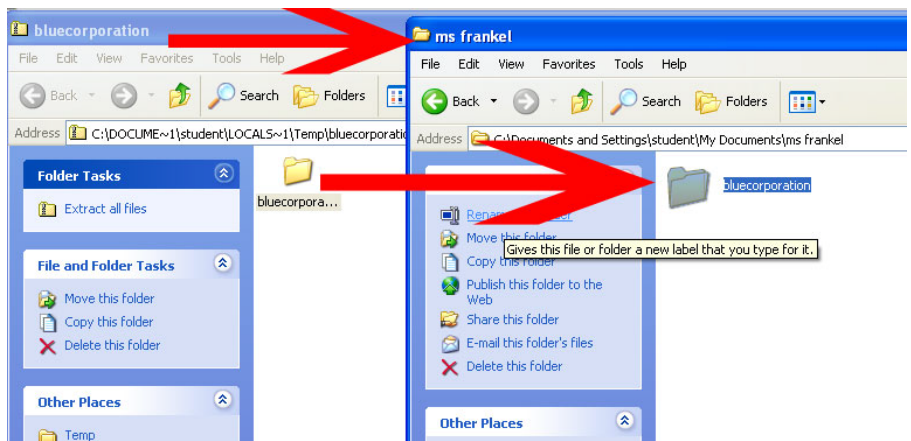

3. You can preview the template by clicking on **Live Demo**.
4. When you are done previewing, click back on your browser to return to the page with the Live Demo link.
5. To download this template, click the **Download Button**.

6. When the dialog box comes up make sure Open With is selected and Compressed Folder (default) is showing. Click **OK**.

7. A folder will open that contains the blue corporation template. Leave this folder open and go to the start menu, click on my documents and open your folder.
8. Once you have the two folders next to each other drag the bluecorporation folder into your folder.

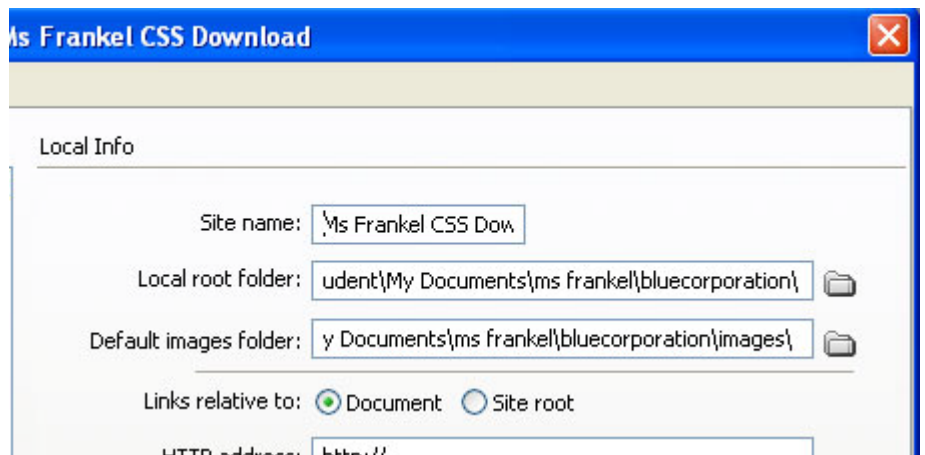

9. Now open Dreamweaver and select **Site > New Site.**

10. Name your site **Your Name CSS Download.**

11. For the root folder go into My Documents, then your folder and select the blue corporation folder.

12. For the images folder go into My Documents, then your folder then blue corporation and select the images folder and click **OK**, then click **Done**.

13. Go to your files panel and click on any of the HTML pages to view and edit them. You can now change the words, images, CSS, and other components to make your own website from this template.
14. You may choose a premade template for your final project, you must however add some images you made in Photoshop and edit all of the HTML and CSS to fit your site.
