

Lesson 3 Lab 1

Designing Web Pages

Files:

Index.html, info-center.html, privacy.html, Copyrights.doc, terms.html, news.jpg, communities.gif

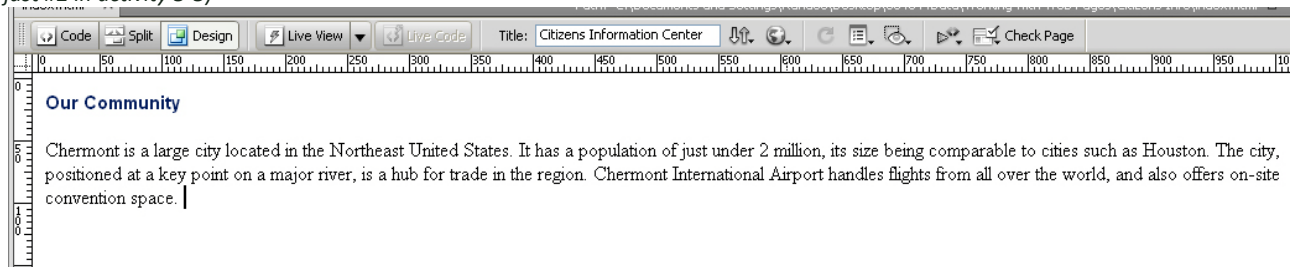

Before You Begin:

Define the Citizens Info (**Site>New Site**) site using data from the **My Documents\Your Folder\Dreamweaver Files\Working with Web Pages\ Citizen's Info folder**.

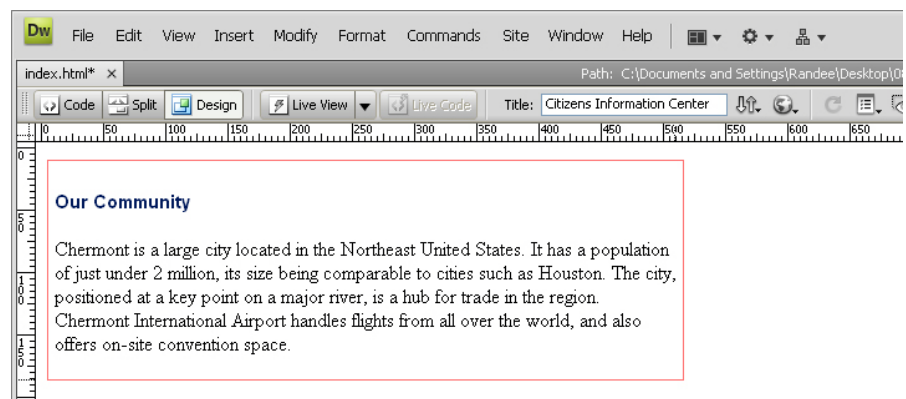

Scenario:

You are designing more web pages for the Citizens Information Center site. You need to ensure that the content on your site pages is properly formatted. On the Information Center page, you want to include a banner of the site and provide information about the temperature in Chermont city during various seasons. In addition to this, your coworker has provided the copyright information in a Word document and privacy policy in a html file and has requested that you include it in the site. As these files were created using Word, you need to ensure that both the files contain proper HTML markup tags.

1. In the **index.html** file, apply the **Heading 1** heading format for the text "Our Community" and specify the CSS heading properties for the page to set the font type to **Arial, Helvetica, sans-serif**, font size to **15**, and color to **#001A5C**. (Hint: This is just #2 in activity 3-3)

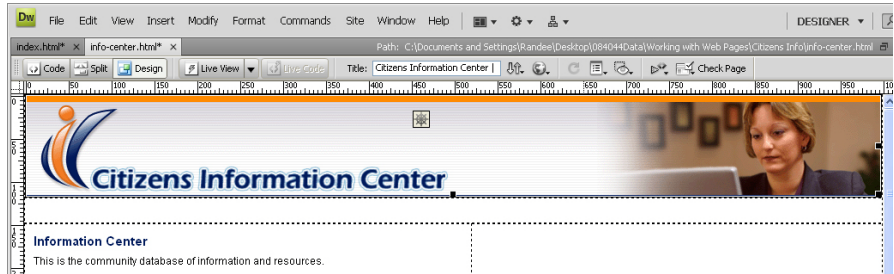

2. Create a div container surrounding the text and specify the ID as **leftcol**. (Hint: This is just #4 in activity 3-3)
3. Create an ID style named **#leftcol** and in the Box category, set the **Width to 500 pixels**, **Float to left**, and the padding for **Top to 5 pixels**. (Hint: This is just #5 in activity 3-3)

- In the **info-center.html** file, under the heading "Community Facilities," format items as an unordered list. (Hint: This is just # 3 in activity 3-2)

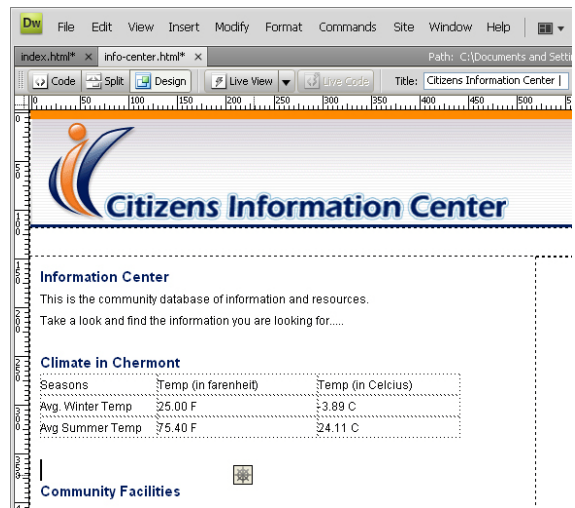

- At the top of the page, in the container for the header, insert the banner.gif image from the **images** folder and set the alternate text to **Citizens Information Center**. (Hint: This is just #1 in activity 3-4)

- Below the heading "Climate in Chermont," create a table with 3 rows, 3 columns, and set the **Table width to 433 pixels, Border thickness to 0, Cell padding to 0, and Cell spacing to 0.** (Hint: This is just #1 in activity 3-53)

- In the table, specify the following information.

Seasons	Temp (in Fahrenheit)	Temp (in Celsius)
Avg. Winter Temp	25.00 F	-3.89 C
Avg. Summer Temp	75.40 F	24.11 C

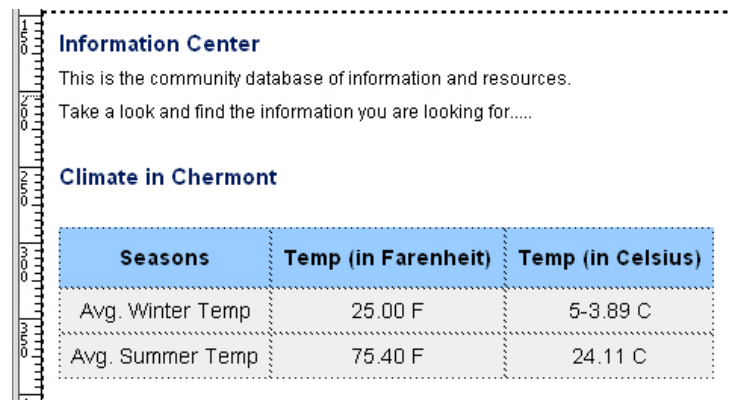

- Create a class style named **.thead** and set the following CSS properties. (Hint: This is just #2 in activity 3-6)

- (Type category) Font-family: **Arial, Helvetica, sans-serif**
- (Type category) Font-size: **14**
- (Type category) Font-weight: **Bold**
- (Background category) Background-color: **#99CCFF**
- (Block category) Text-align: **Center**

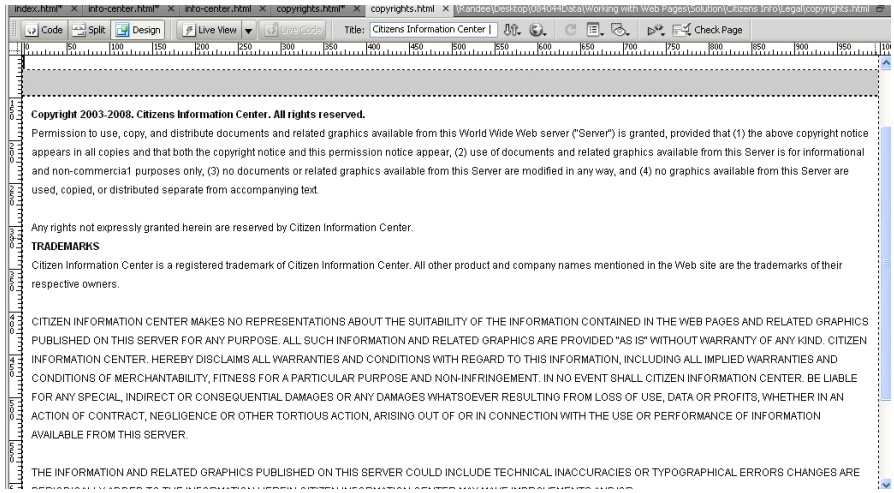

- Create a class style named **.tbody** and set the following CSS properties. (Hint: This is just #3 in activity 3-6)

- Font-family: **Arial, Helvetica, sans-serif**
- Font-size: **14**
- Background-color: **#EFEFEF**
- Text-align: **Center**

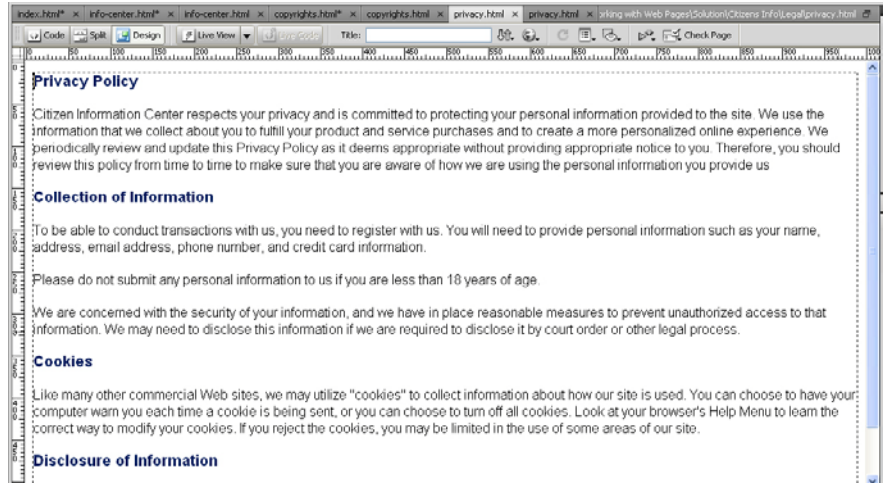

- Apply the **.thead** class style to the first row and apply **the .tbody** class style to the last two rows. (Hint: This is just #5 in activity 3-6)

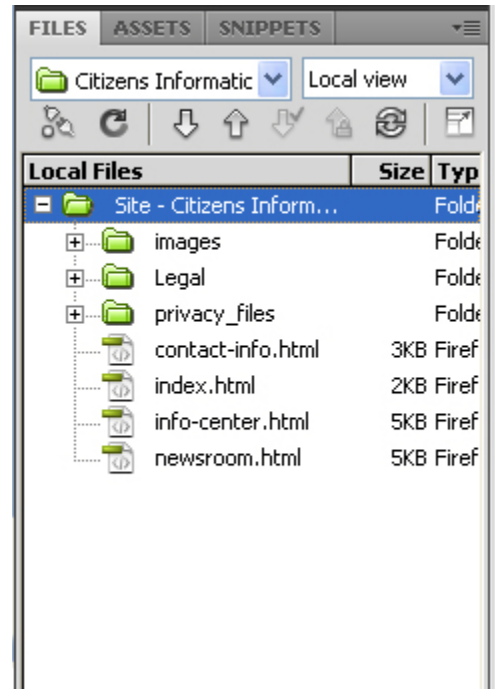

- Open the **copyrights.html** file and import the **Copyrights.doc** file. (Hint: This is just #1 in activity 3-7)

- Open the **privacy.html** file and clean up the word HTML. (Hint: This is just #2 in activity 3-7)

- Move the **news.jpg** and **communities.gif** files to the **images** folder. (Hint: This is just #1 in activity 3-9)
- Create a subfolder named **Legal** and move the **copyrights.html**, **privacy.html**, and **terms.html** files to it. (Hint: This is just #2 & #3 in activity 3-9)

	Points	Score
Apply Heading 1 heading format to the text "Our Community"	1pts	
Specify the CSS heading properties for the page to set the font type to Arial, Helvetica, sans-serif, font size to 15, and color to #001A5C.	1pts	
Create a container surrounding the text and specify the ID as <i>leftcol</i> .	1pts	
Create an ID style named <i>#leftcol</i> and in the Box category, set the Width to 500 pixels, Float to left, and the padding for Top to 5 pixels.	1pts	
In the info-center.html file, under the heading "Community Facilities," format the items as an unordered list	1pts	
Insert the banner.gif image from the images folder and set the alternate text to <i>Citizens Information Center</i> .	1pts	
Below the heading "Climate in Chermont," create a table with 3 rows, 3 columns, and set the Table width to 433 pixels, Border thickness to 0, Cell padding to 0, and Cell spacing to 0	1pts	
Create a class style named <i>.thead</i> and set the CSS properties.	1pts	
Create a class style named <i>.tbody</i> and set the following CSS properties.	1pts	
Apply the <i>.thead</i> class style to the first row and apply the <i>.tbody</i> class style to the last two rows.	1pts	
Open the copyrights.html file and import the Copyrights.doc file	1pts	
Open the privacy.html file and clean up the word HTML.	1pts	
Move the news.jpg and communities.gif files to the <i>images</i> folder.	1pts	
Create a subfolder named <i>Legal</i> and move the copyrights.html, privacy.html, and terms.html files to it.	1pts	
Total	14pts
