

Dreamweaver Lesson 2 Lab

Building a Website

Data Files:

Introduction.txt

Scenario

The structure of Citizens Info site is defined. As you develop the site further, you may want to be able to access the files through Dreamweaver to maintain the structure of the site. You may also want to create a home page using the information provided in the Introduction.txt file.

1. Define a site named **Citizens Info** and specify the local root folder location as C:\Documents and Settings\Student\My Documents\Your Folder\Dreamweaver Files\Building a Website\Citizens Info. Set the remote server connection method to **None**.
2. Modify the site definition to specify the default images folder location as C:\Documents and Settings\Student\My Documents\Your Folder\Dreamweaver Files\ Building a Website\Citizens Info\images.
3. Create a blank **HTML** document and set the title as **Citizens Information Center**.
4. Include the keywords **Citizens Information Center, Chermont, community** and the description **Dedicated to bringing people together**.
5. In the document, add the text (copy and paste) from the Introduction.txt file and remove the empty paragraphs.
6. Save the document as **index.htm**
7. Call me over so I can check it.
