

ACTIVITY 3-1

Understanding Cascading Style Sheets

Scenario'

You are creating web pages and you need to apply formatting to enhance the appearance of the pages. Before you' do that, you want to ensure that you are familiar with the various type of CSS and CSS styles that can be used.

1. What is an embedded style?

- (a) A type of CSS that is defined in the head section using the <style> tag.
- (b) A set of class styles that can be applied to any element on a page.
- (c) A type of CSS that is applied directly to tags on a web page using the style attribute.
- (d) A CSS file that is attached to a web page.

2. What is a tag style?

- (a) A CSS style that is saved as a separate CSS file and attached to a web page.
- (b) A CSS style that can be applied to a particular tag on a page.
- (c) A CSS style that can be applied to multiple elements on a page.
- (d) A CSS style that can be applied directly to tags on a web page using the style attribute.

3. Which of these are the types of CSS?

- a. Inline style
- b. Class style
- c. Embedded style
- d. External style
