

ACTIVITY 1-1

Examining the Basic Concepts of Web Designing

Scenario:

You want to create a website that provides information about your company. Before proceeding with the task, you want to ensure that you are familiar with the basic concepts of web designing.

1. What does the first part of the **URL** indicate?
 - a. IP Address
 - b. Domain Name
 - c. File Name
 - d. Protocol
2. Which statement is true about websites?
 - a. A website can contain only one web page.
 - b. The web pages on a website cannot be linked through images
 - c. A website is accessed using its URL.
 - d. Websites can contain information only in the form of text.
3. True or False? Before creating a website, you need to identify the audience who will be visiting the site.
