

Creating Hyperlinks in your Sidebar

First Lets Format our heading

1. Highlight the text *Content for id "sidebar" Goes Here.*
2. Press Delete and Links
3. Select the text *Links* and on the property inspector drop down box select *Heading 1.*

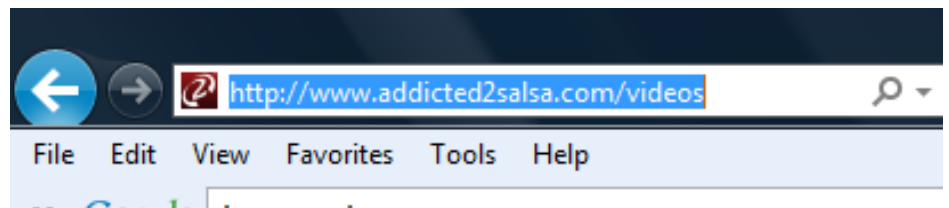

4. In the New CSS Rule box, use these setting and click OK:
 - a. Selector Type: TAG
 - b. Selector Name: h1
 - c. Define in: style.css
5. In the CSS Rule definition for h1

| Category | Setting | Value |
|------------|------------------|--|
| Type | Font-family | Choose a font (I chose Arial Black, Gadget, sans-serif) |
| | Font-Size | Choose a size (I chose 36px) |
| | Font Color | Choose a color (I chose white #FFFFFF) |
| Background | Background Color | Choose a color (You can use the eye dropper to sample a color from somewhere on your page) |

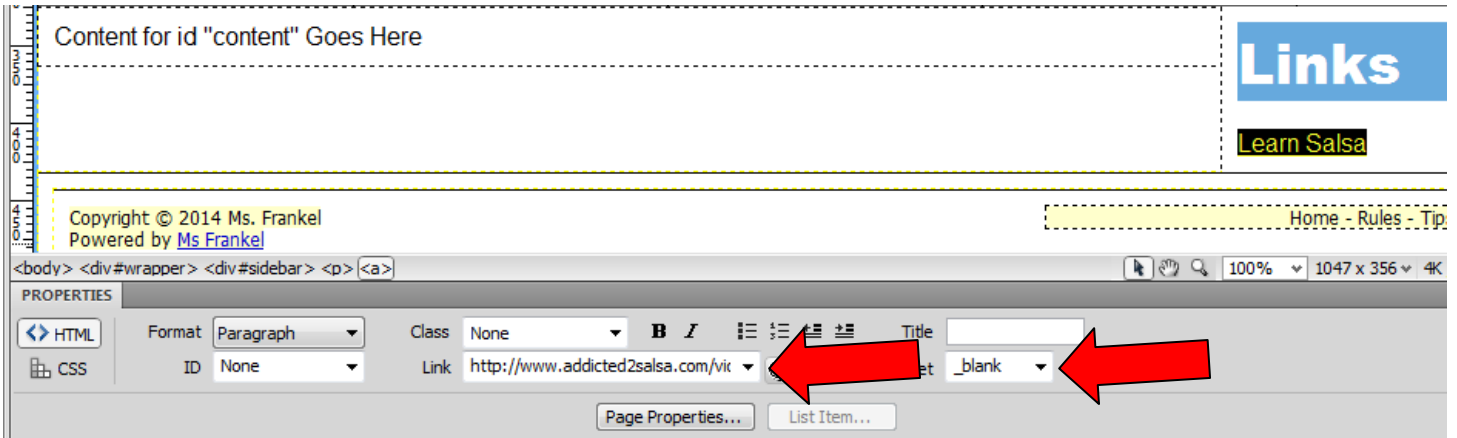

6. Click OK

Now let's create the hyperlinks.

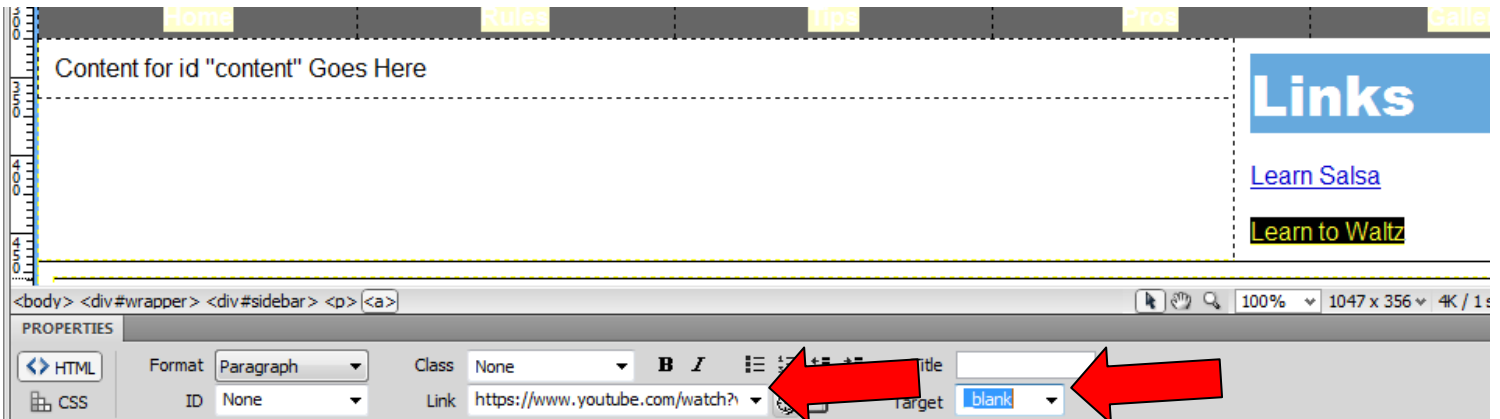

7. You are now going to google and find websites that you would like to link your page to having to do with the sport you chose. You should only select sites you think are very informative. Once you have the site you will type the text you want the people to click on. For example my first link will be to a page that has videos for salsa dancing lessons. So I am going to copy the web address for the page I want to link.
8. Then I will type the text Learn Salsa and highlight it.

9. In the link box on the property inspector I will paste the address. In the Target box I will choose _blank so the link opens up in another window and my site stay open too.

10. Now go to the end of your first link and press enter twice.
11. Type the text for your next link. Mine is Learn to Waltz.
12. Highlight that text and again paste the URL in the link box and select _blank for Target.

13. Continue this process until you have a nice collection of links related to your sport.
14. When you are finished, save your page and press F12. Test your links to make sure they work.
15. You can also use Site > Check Links Sitewide or press Ctrl and F8 at the same time. This will check your entire site for links that do not work.
